

OCAL CONFIDENCE

Made to perform in the field — not just in theory

Ocal[®]

PVC-coated conduit and fittings
offering you confidence in:

- Quality
- Performance
- Expertise
- Service

**ENGINEERED
TO OUTFIT**

OCAL CONFIDENCE

Ocal® PVC-coated conduit and fittings are manufactured in Jonesboro, Arkansas, with one goal in mind — giving contractors and engineers confidence on the jobsite.

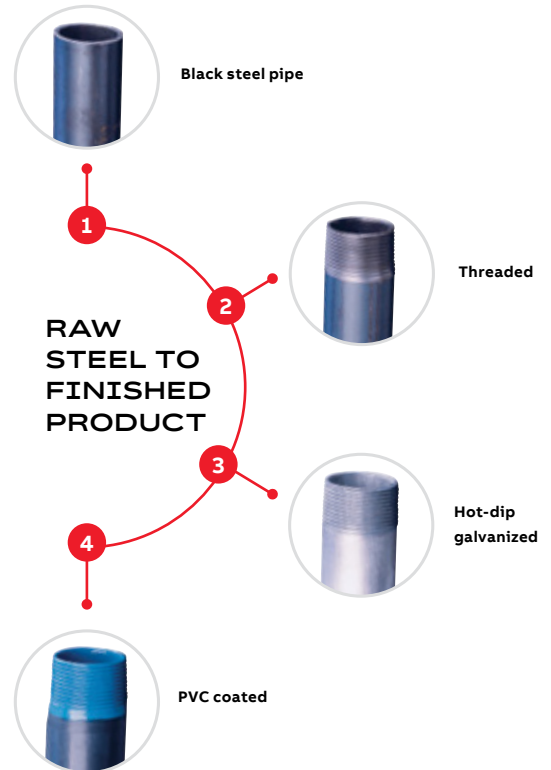

TOTAL
QUALITY
CONTROL

CONFIDENCE IN QUALITY

Ocal conduit starts as black steel pipe that is then hot-dip galvanized and coated with PVC — all under one roof in the ABB Jonesboro, Arkansas, manufacturing facility. Many Ocal fittings, whether T&B® Fittings or Steel City® brand, are also manufactured here, and all fittings are PVC coated in Jonesboro.

Controlling the entire process in-house — from raw steel to finished product — means no reliance on pre-galvanized pipe from outside vendors and no risk of transit damage. This translates to total quality control.

CORROSION
PROTECTION

CONFIDENCE IN PERFORMANCE

Contractors install Ocal PVC-coated conduit systems in extremely harsh and demanding environments, including chemical refineries, oil and gas plants, wastewater treatment facilities, infrastructure and marine/coastal sites.

That's why ABB threads the pipe before hot-dip galvanizing, so that the threads — the most vulnerable part of the system — are protected by zinc. Fittings are coated inside and out with a layer of urethane before PVC coating, **providing multiple layers of defense against corrosion.**

**EXTENDED
5-YEAR
WARRANTY**

CONFIDENCE IN EXPERTISE

Installing PVC-coated conduit requires skill. ABB helps contractors build their expertise with a nationwide network of Ocal installation training masters. These individuals get their own training in both classroom theory and hands-on techniques in the Jonesboro facility, preparing them to certify installers across the U.S.

Becoming an Ocal certified installer not only builds your skill and confidence in this specialized area, but also unlocks an extended product warranty — from the standard two years to five years.

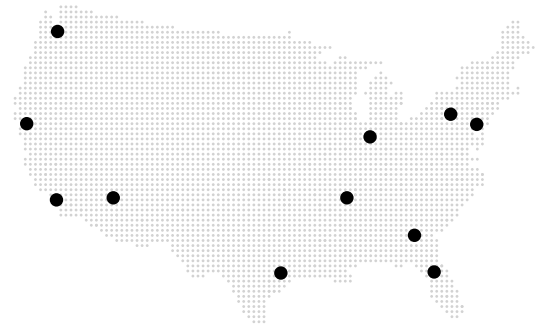

**WHAT YOU
NEED, WHEN
YOU NEED IT**

CONFIDENCE IN SERVICE

ABB understands the pressures contractors face — tight schedules, evolving designs and last-minute changes. **That's why the Jonesboro facility is built for scale and speed.**

And with 11 stocking locations across North America, you can be sure you'll get the Ocal products you need when you need them — whether they're for a small retrofit project or a mega-scale industrial project.
